

Michael Lemiale

Staff Data Engineer

French & American Citizen

PROFESSIONAL SUMMARY

Staff Data Engineer with 8+ years of experience designing scalable data platforms, building production-grade pipelines, and leading high-performing data teams. Proven track record of consolidating complex warehouse environments, implementing CI/CD best practices, and shipping infrastructure that empowers entire organizations to make data-driven decisions.

WORK EXPERIENCE

Articulate

Market leader in e-learning, building online training apps for a global client base including all Fortune 100 companies.

Staff Data Engineer

Jan 2025 – Present

- Architected and deployed **Dagster** pipelines on **Kubernetes** with **sling** and **Terraform**, streaming millions of rows daily from PostgreSQL into Snowflake — fully self-hosted and version-controlled
- Built custom ingestion pipelines with **Dagster** and **dlt** to pull data from third-party APIs and internal services into Snowflake, eliminating manual data loads
- Deployed a self-hosted **Metabase** instance, democratizing data access for product engineers and reducing ad-hoc query requests by the analytics team
- Shipped **MCP integrations** across Omni, Snowflake, and Metabase — enabling teams to leverage AI when querying data infrastructure
- Defined the data team's AI strategy and represented the team on the engineering steering committee

Senior Data Engineer

Jan 2023 – Jan 2025

- Led migration and consolidation of two data warehouse environments from **BigQuery** and **Redshift** into **Snowflake**, improving scalability with auto-scaling compute and reducing query times by up to 40%
- Mentored 3 analytics engineers and 2 data analysts, providing cross-functional guidance on high-priority initiatives
- Spearheaded CI/CD framework implementation with **GitHub Actions**, **Terraform**, and **dbt**, standardizing deployment practices and elevating team confidence in releases
- Designed incremental pipelines ingesting hundreds of terabytes from dozens of APIs and application databases into the warehouse with **Python**, **dlt**, **Dagster**, and **sling**
- Built rapid local development tooling, cutting environment setup time to 20 minutes and accelerating team productivity

The Zebra

Online insurance comparison marketplace based in Austin, Texas — simplifying the process of comparing quotes from 200+ carriers.

Senior Analytics Engineer

May 2020 – Jan 2023

- Directed transition to a modular data warehouse architecture, reducing **Snowflake** operational costs by 25%
- Co-designed a SQL unit testing framework with Data Engineering, increasing deployment confidence and code coverage across the platform
- Built a regression testing framework ensuring historical data integrity during deployments

Analytics Engineer II

May 2018 – May 2020

- Migrated Looker data models to **dbt**, cutting build times by 50% with incremental and ephemeral materialization strategies
- Automated manual Excel imports into the warehouse with scalable pipelines, eliminating 40 hours of manual work per month
- Led the transition of ETL tooling from Aloomo to **Fivetran**, streamlining ingestion for dozens of data sources

Under Armour

\$2.8B American sportswear powerhouse based in Baltimore, Maryland.

BI Developer

May 2017 – May 2018

- Built and maintained data models in **SAP HANA**, supporting critical BI initiatives and enabling data-driven reporting across teams
- Created standardized reporting datasets in **Tableau** and **Business Objects**, improving access to KPIs

Data Analyst

Nov 2016 – May 2017

- Partnered with SAP ERP consultants to translate legacy data models into the new **SAP HANA** warehouse environment
- Built single-source-of-truth data models and front-end analytics hubs, improving reporting accuracy

EDUCATION

University of Maryland, College Park

Aug 2012 – May 2016

Bachelor of Science — Information Systems

Bachelor of Science — Finance

SKILLS

Programming

SQL, Python, Go, JavaScript, TypeScript

Frameworks & Tools

dbt, Jinja, Fivetran, Stitch, sling, dlt, Dagster, Prefect, Airflow, Terraform, Kubernetes, GitHub Actions, GitLab Pipelines

Cloud

AWS, GCP

Analytics & BI

Omni, Looker, Tableau, Power BI, Mode, Metabase

Databases

Snowflake, Redshift, BigQuery, PostgreSQL, MySQL, SQL Server

Languages

English — Native, French — Fluent, Spanish — Proficient
